What other symbols are on a map?

## MAPS

A map is a representation of a place. It's got a scale and a legend. A scale of 1:100,000 means that one centimetre on the map equals 100,000 centimetres, or one kilometre, in the place.

There are some symbols in the legend. An area with green trees is a forest, and a blue line is a river. A black dotted line is a path. There is a small black triangle and a number for a hill. The number - for example 112 - means that the hill is 112 metres high. Red lines are roads, and a railway is a black line with smaller lines on it. A black circle on a railway is a train station. A red area is a city or town. Next to the red area is the name of the city.

- 3 Look at map A and choose the correct words.

The scale is <sup>1</sup>1:100,000 / 1:50,000. There are a lot of <sup>2</sup>paths / railways on this map, and there's one <sup>3</sup>hill / forest. It is <sup>4</sup>246 / 156 metres high. There's also a big <sup>5</sup>town / road and a <sup>6</sup>train station / city on the map.

- 4 Look at part of the guide map of Bà Nà Hills Mountain Resort and answer the questions.

- How many cable car stations are there in the resort?
- Can you find a restaurant in the Fantasy Park?
- Which cable car line doesn't cross the Mơ River?

- 5 **USE IT!** Work in pairs. Draw a map of a place you know or an imaginary place. Then take turns asking and answering about your map.
